Cosmic Secrets & Hidden Patterns

Astrological Trivia & Little-Known Facts

The natal Moon occupies Dhanishta; its exact position determines the opening Dasha balance. Your birth chart rises in Pisces, while this year's chart rises in Gemini: a familiar life story viewed from a different angle. Venus stands out in your birth chart's strength assessment. Think of this as a capacity to cultivate, rather than a promise that everything will come easily.

Celebrity Chart Matches

A reliable celebrity comparison needs documented birth details. No verified match is available for this reading, so your own chart remains the focus.

Hidden Talents

Venus's strength draws attention to your potential around networks and gains. Give these interests a practical outlet through regular practice and real-world feedback. Your Shravana placement adds a personal note to this pattern; the useful question is how you choose to develop it.

Karmic & Developmental Notes

This year brings professional responsibility into your developmental story. Notice which familiar habits help you grow and which deserve a

gentler rethink. Read these patterns as invitations to reflection and choice, rather than fixed conclusions about your destiny or past lives.

Mudda Dasha uses the progressed natal nakshatra lord without opening balance and proportional subdivisions of a 365.25-day year, following the owner reference's printed convention. The year-length convention is inferred from its date-only boundaries. Natal Vimshottari Mahadasha, Antardasha and finer periods, Shadbala, D9, Ashtakavarga (BAV/SAV), Saham activation and Tajika support or obstruction are evaluated for each month. Transit houses are counted from

natal Moon; the Gochar table's support columns show individual BAV and total SAV scores, and its qualification column records Vedha.

All nine grahas are evaluated throughout the annual interval. Computed event coverage includes sign changes, classical-planet and true-node stations, and exact ecliptic conjunctions to the natal Sun, Moon and Ascendant. Other transit aspects are not implemented. Conjunctions are geometric contacts, not guaranteed life events. Monthly prose: deterministic evidence fallback; all twelve evidence packets supplied together. Evidence references and repetition checks are retained in the development audit. Automated checks cannot certify interpretive correctness.

equal elapsed-time intervals; not Tajika masa-pravesha charts. existing Lahiri linear-of-date implementation. Parashara's Light 9.0 reference has been transcribed; numerical comparison has not been run. Coordinates, timezone and node settings are not printed in the supplied reference.
